

Day 1 Session on innovative audit experience

Agenda Item Overview

On Tuesday, 8 November a separate session is scheduled for reviewing new trends in environmental audits.

Novelty can be seen in various characteristics. It could consist in a fresh approach to a given topic or in the way how it is focused; in rare or unexpected methodology; in the way how experts are involved; in cooperation with unexpected partners; in maximizing audit results with a public campaign or in some characteristic not mentioned here.

In 15-minute presentations, the selected SAIs will share their audit experience which has involved innovative approach in some aspect.

- **The Netherlands** - Audit on spatial planning
- **Brazil** - Work performed by TCU involving the Precautionary Principle
- **Iran** - Environmental audit of Caspian Sea
- **Argentina** - Integral management project and master plan for the development of the Pilcomayo river basin.

Additional case in the compendium:

- **INDIA** - Managing stakeholder expectations ... new initiatives in environment audit by SAI India

Presentations will be followed by plenary discussion.
